

WHAT IS CLAIMED IS:

R.126 36. An electrical module comprising:

a plurality of busses;

a plurality of spring contacts, each of which extends from a corresponding one

5 of said busses;

a user-accessible electrical function in communications with said busses; and

a housing having recessed portions which retain said contacts, said housing and said contacts adapted to removably snap into an electrical wiring panel so as to provide electrical power for said user-accessible electrical function.
